DETAILED ACTION

Response to Arguments

1. Applicant's election with traverse of restriction, claims 1-10 from group I and II of groups I-VI in the reply filed on 11/07/2005 is acknowledged. The traversal is on the ground(s) that "there must be a serious burden upon the Examiner if the restriction is not required". This is not found persuasive because having to examine two different inventions together is a serious burden upon the Examiner. The claims of group I require a search regarding the n-bit representation convertible to a lower-precision representation by assigning zero values to one or more of the bits in the least significant byte. The claims of group II require a search regarding the n-bit representation convertible to a higher-precision representation by changing an identifier for the video data.

The MPEP states, "Where it is necessary to search for one of the distinct subjects in places where no pertinent art to the other subject exists, a different field of search is shown, even though the two are classified together. The indicated different field of search must in fact be pertinent to the type of subject matter covered by the claims. Patents need not be cited to show different fields of search."

Moreover, if Applicant is traversing on the ground that the restrictions are not patentably distinct, Applicant should submit evidence or identify such evidence now of record showing the restrictions to be obvious variants or clearly admit on the record that this is the case.

Art Unit: 2676

Since the above-mentioned amendment appears to be a *bona fide* attempt to reply, applicant is given a TIME PERIOD of ONE (1) MONTH or THIRTY (30) DAYS, whichever is longer, from the mailing date of this notice within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD UNDER 37 CFR 1.136(a) ARE AVAILABLE.
